Completed its  
examination of  
the elements?

Iron, aluminum, nickel, silicates,  
chondrites, magnesium, ammonia ...  
no exotic matter

So I think we can finish the  
job and return to the  
satellite

So I collect some samples of these  
crystals! Although inert, emit an  
almost imperceptible vibration, as if  
in response to the touch

We can analyze the best  
satellite lab!

The computer determined a new trajectory for this asteroid will not collide with the earth in the future. Can we redirect it

Alright, I'll do it!

Stars!

Superman could enlighten me what this is?

We will be attacked?

**TIP!**

I also feel strange,  
as if ... as if ...

You were under the  
influence of crystal that  
was being analyzed in the  
laboratory

The computer has completed  
the analysis and was just  
waiting for command to isolate  
and stop the effect.

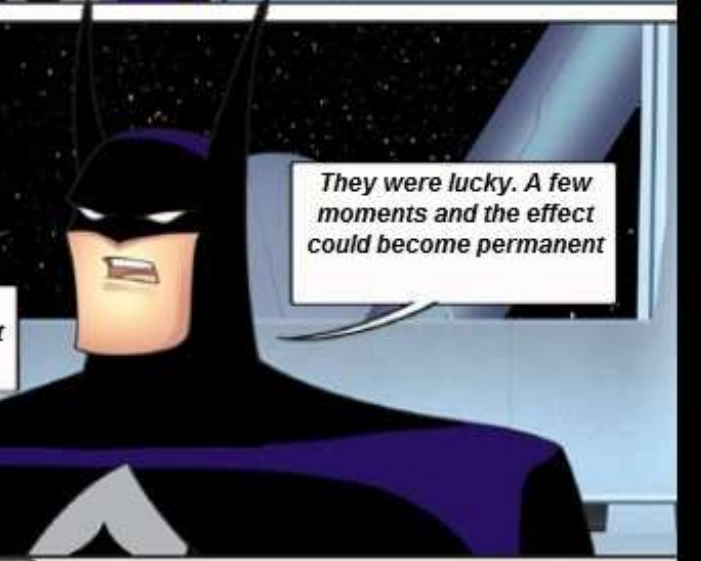

Since you were here  
... how?

The Crystal has a  
strong power on the  
dash that controls the  
pre llíbido and you were  
open to it ... so it was  
easier

Now wait a  
minute, Bat! we do  
not ...

Yes ... you were  
careless and negligent

They were lucky. A few  
moments and the effect  
could become permanent

You love the yes of  
his own voice, is  
not it?

His ring automatically protects  
small setbacks, but you did not  
pay attention and ended up being  
influenced also

But as you have  
not been affected?

I have my  
methods

But that does not matter now. Already are free!

Need us down there! A fleet of alien invaders are attacking the White House and we can not waste any more time

hrrm ... that sucks! Why does he always have to have a reason?

Makes me want to put some of that crystal in his coffee ... just to see the bat missing a beat

Who knows, right?

Well, we expel the invaders from the White House again!

hehehe .. still think my card useless sinalizaça?

Alien invaders, follow to the USA

Giant monsters follow to Japan
